

## HOW TO APPLY KEYBOARD STICKERS

### STRONG WARNING!

We know you are excited to receive your new keyboard stickers and are eager to get them put on your keyboard. However, the fine art of applying keyboard stickers requires a calm mind and steady hands.

- Please read all of the instructions before you begin.
- Take a deep breath and do not hurry.

If you follow these instructions, your keyboard stickers will be an attractive addition to your keyboard.

1. The keyboard sticker template has the same layout as your keyboard. It is best to start on the top row. Begin from either the left or the right side. Follow the steps to apply the stickers, one at a time, to your keyboard in the same order.
2. To remove a sticker from the template, first fold the template vertically at one edge of the sticker.
3. With a pair of tweezers, gently tease an edge or corner loose from the backing.
4. Grasp the edge or corner with the tweezers and slowly pull the sticker half-way off the backing.
5. Reposition the tweezers to grasp the middle of the sticker from the side and lift the sticker off the template completely.
6. Use a finger or the eraser end of a pencil to press down the key so it will not move while you apply the sticker.
7. Hold the sticker slightly above the key until you are in exactly the right position.
8. Press the sticker down on the key, releasing and removing the tweezers.
9. The adhesive on the back of the stickers is extremely strong. If you miss and place the sticker at an angle or on the wrong key, it will be difficult to remove and will probably not stick back on a second time.
10. It is best to cut off each row of the template as you proceed since it is easier to remove the stickers when they are near the edge of the template.
11. If you should destroy any of the stickers while you are trying to apply them to your keyboard--DON'T PANIC! We will send you replacement stickers for the problem keys at US\$0.50 each plus US\$1.00 for mailing them to you.
